

SPIRAL BINDING PROOF

One A4 sheet becomes two A5 leaves. Cut it; do not fold it.

PRINT

A4 landscape, actual size / 100%, double-sided, short-edge binding. Use the prepared PDF directly: no Booklet mode and no additional two-up layout.

CUT AND STACK

1. Keep the side showing this panel and Cover & Defence face up.
2. Cut vertically at 148.5 mm, along the centre marks.
3. Put the left piece (this front) on top of the right piece. Keep both tops aligned.
4. With this front facing you, punch the stack's left edge and add the spiral.

Check the reverse sides before punching: this leaf has Take the Shot on its back. Cover & Defence has the review checklist on its back.

COVER & DEFENCE

Cover changes the attack. An aware defender may React only after a hit.

AFTER A HIT: SHIELD PARRY

-1P

TERRAIN COVER

Partial (low wall): attack -1P. Substantial (battlements): attack -2P. Complete: blocked attack line, no attack. Cover absorbs no damage.

DODGE. Dodge -1P: once per round, base Reaction only. Perceive the danger and be able to move away.

ACTIVE GUARD

Test **Close Combat** with an eligible ready item:

- **Thrown weapon:** ready weapon -1P; ready shield **no guard penalty**.
- **Arrow, bolt, or sling projectile:** shield only, -1P.

Carrying a shield adds **no attack penalty**. A shield unavailable during two-handed use cannot guard.

RESOLVE THE DEFENCE

Ordinary hit: successful Dodge avoids it; successful Parry blocks by Size. Any ready shield fully blocks a **Light** projectile on success.

Critical hit: ordinary defence success means normal rolled damage after armour, with no avoidance or Parry reduction. **Critical defence** stops it, regardless of Size.

EXTRA GUARD. Extra off-hand Reaction: **add -1P** (shield vs arrow: -2P before other modifiers); cannot Dodge. **One Reaction per attack.**

CHECK BEFORE BINDING

15 mm binding allowance

The reading pages reserve 15 mm at the binding edge, mirrored on front and back. This is a working clearance, not a hole template. Check your punch or print shop's requirements before punching.

Both sides must be upright. If not, correct the duplex orientation and print another test.

Check that the 11-point rules text remains comfortable and clear of the holes.

Turn to the middle: Take the Shot is on the left and Cover & Defence is on the right.

Fold each leaf back around the spiral to check single-page use.

FORMAT TEST ONLY

These instruction panels are not proposed handbook covers. Final pagination remains open. Spiral binding does not require multiples of four; unused print slots can stay blank.

Review copy. Retain the accompanying player-handbook/LICENSE.md with any distribution.

TAKE THE SHOT

Spend a **Combat Action** and test **Ranged Combat**. Cover modifies this roll; the defender reacts only after a hit.

RANGE

Up to listed Range (**R**): normal. Beyond R through **2R**: **-2P**. Beyond 2R: no shot. **Shortbow**: R = 75 m; 2R = 150 m.

AIM

Spend a **Combat Action** aiming at one visible target: **+1B** to your next ranged attack against it. Lose Aim on **any Reaction**, loss of sight, or failure to shoot with your **next Combat Action**.

DAMAGE AND CLOSE USE

Thrown weapons add **DM** and keep their listed **Size**. Bows, crossbows, and slings add no DM; their projectiles are **Light**.

Within **2 m**, a **Close**-tagged ranged weapon can use Close Combat and its listed damage. Without that tag, it is an improvised **Light club**: **1D6 + DM**, attacking at **-1P**.

SHOOTING INTO A CROWD

Apply cover normally. An ordinary failure misses. Only a **Fumble** may hit a fairly or randomly selected nearby target: normal rolled damage, then armour.

WORKED SHOT

Aim **+1B** and a low wall **-1P** cancel. Roll normally. If the attack hits, resolve the defender's Reaction separately.
